

CUSTOMER CASE STUDY

P2P IMPLEMENTATION IN RECORD 8 WEEKS:
Accelerated Supplier Enablement & Invoice Automation

Our users went right into the system with only a few training guides. Our team believes they didn't even need to use the guides because the system was that easy to navigate. One surprise for us was how easy it was to manage our catalogs. We have more control and flexibility than we had before. We were able to make our own updates without support or additional services."

Cindy Seabrease

Director of Purchasing and Accounts Payable Maxim Healthcare

OBJECTIVES

- Increase supplier enablement
- Automate invoicing process
- Achieve high user adoption
- Identify enhancements based on Supply Chain best practices
- Self-sufficient with post go-live support

? CHALLENGE

- ✓ Supplier enablement very low only 15 suppliers enabled over 7-year period
- Supplier fees seen as a barrier to connect
- Paper invoice volume increased with previous P2P system due to complexity and poor UI
- Slow system and errors led to time consuming processes with too many clicks, causing frustration
- Investment in prior P2P system far greater than the ROI achieved
- Manual invoice conversion invoices were being processed through an invoice conversion service
- Difficulty purchasing on contract lack of flexibility and usability of catalog management and invoicing capability meant limited user adoption

BENEFITS IN 8 WEEKS

1118 Maxim users enabled

2162 Catalog items available

Hosted supplier catalogs available

Accelerated supplier onboarding. More in 8 weeks than previous 7 yrs.

Rapid time-to-value and replacement of failed solution

END USER FEEDBACK

- 66 Much improved compared to previous P2P system. User friendly.
 99
- Easy access to catalogs "
- 66 Add to cart item selection is great "
- Good system for our needs "
